

Lillian Stewart

BALKIS, 'SILVER ORB' AM/AOS
X CARISONA

The world's most honored Cymbidium cross . . . In 1958 this now famous 'Stewart Bred' cross won more top awards in America than any other Cymbidium — 8 Awards of Merit, one First Class Certificate, 4 Bronze Medals, 6 Highly Commended Certificates, and many other awards were but the prelude to the new show of breathtaking Cymbidium beauty that is unfolding to orchid growers throughout the world.

And now in the same pattern of magnificence we offer a new strain of Lillian Stewart. We present our

Lillian Stewart #1506

The parents of #1506 Lillian Stewart are the spectacularly free flowering large, dark red Carisona, 'Abundance' crossed by the world's most sought after tetraploid Cymbidium parent, BALKIS, 'SILVER ORB' AM/AOS. In the Stewart tradition of giving complete information about a cross, we would like to tell you about the parents used here, as well as the characteristics of the cross itself, which we have observed.

CARISONA, 'ABUNDANCE,' the parent which carried the seed pod, is a diploid. We used it with BALKIS, 'SILVER ORB' because it is a large dark red that carries up to 25 flowers to the spray. Genetically the potential of Carisona, 'Abundance' is 30 flowers or more. Of equal value in breeding is its consistent ability to flower regularly and heavily. Our plant of Carisona, 'Abundance' quite regularly throws 2 spikes to a single lead bulb. Imagine seeing this fine red in bloom with 50, 75 or a hundred dark red blooms out at one time! The reason we are enthusiastic about this parent, though, is that it passes these qualities to its progeny. Although a year younger than #1480 Lillian Stewart, #1506 is already placing a bid to be one of the most prolific free flowering top quality Cymbidium crosses in cultivation.

BALKIS, 'SILVER ORB' AM/AOS is recognized by Cymbidium experts throughout the world to be the leading new parent. It is with BALKIS, 'SILVER ORB' that we at Stewarts have been able to achieve standards of excellence in Cymbidiums surpassing in general high quality all other accepted lines of breeding.

The quality of the new BALKIS 'SILVER ORB' hybrids is so high that most Cymbidium growers have to actually see a group of BALKIS, 'SILVER ORB' hybrids in bloom before they will believe such quality can be bred.

This spring we flowered the first plants of our #1506 Lillian Stewart. The flowers on the average, were very

OFFER #46-C

Are you a "can't wait"? Buy 4 of \$25.00 (2 bulb and strong growth size) and we'll send you a 2 bulb \$25.00 plant of #1506 *in spike* FREE. 5 Superb plants to show spike or bloom in one year or less for **ONLY \$98.75** (A 125.00 Value)

large, many 4" or larger, on first bloom seedlings. As we expected, the colors were mostly pinks with up to 12 and 15 flowers to the spray on first bloom.

The expectancy for this cross? We are confident that the colors will be almost entirely in pinks from very light through to an occasionally dark red. We have already flowered several reds! There will be a few whites, too. Size of flower, vigor, and productivity are all qualities you can expect and will get in this cross.

We are raising a substantial number of #1506, Lillian Stewart, because we know it is the kind of cross you want for pleasure *or* profit.

The plants we offer here are of exceptional vigor and quality. We are confident you will be delighted with their "value plus" quality.

Robust first seedling bulb and sturdy new growth \$ 7.50
Extra large first bulb and growth \$15.00
Splendid two-bulb and strong growth plants \$25.00
(See #46C)

SPECIAL FALL LILLIAN STEWART OFFER #46

We will send one each of 3 sizes offered, a \$47.50 value, for only **\$34.50** — a **\$13.00** savings! Here is a rare pre-season offer. Select 4 of \$7.50 or \$15.00 size (they must all be of same price class) and pick a 5th of same price FREE.

California purchasers add 4% sales tax.

This offer expires December 30, 1958

All orders will be shipped via Railway Express collect unless we are instructed otherwise.
